Lecturer Position in International/Human Security

The Department of Political Science at the University of New Hampshire seeks a full-time Lecturer for AY 2019-2020 with research and teaching expertise in international and/or human security. Preference for regional and linguistic expertise in sub-Saharan Africa, Russia, or Eurasia. Possibility of renewal or opportunity to apply for a tenure-track line.

The Lecturer will support curricular offerings in international relations and international affairs. The appointment includes 6 courses per year and one unit of service. Courses include 3-4 sections of Political Science 403: The US in the World, a required survey course of US foreign policy since 1945; and 2 sections of International Affairs 501, Global Issues in International Affairs. Lecturers at UNH are unionized through AAUP and receive competitive salaries and benefits.

The Department of Political Science offers a BA and MA in Political Science and a minor in Security Studies. Department faculty also support the International Affairs Program, the UNH Model UN, and interdisciplinary minors in Latin American Studies, Middle East Studies, and Asian Studies.

The University of New Hampshire is an Equal Opportunity/Equal Access/Affirmative Action institution. The University seeks excellence through diversity among its administrators, faculty, staff, and students. The university prohibits discrimination on the basis of race, color, religion, sex, age, national origin, sexual orientation, gender identity or expression, disability, veteran status, or marital status. Application by members of all underrepresented groups is encouraged.

Please send a CV and cover letter with evidence of teaching experience/interest to Heather.Austin@unh.edu

World101 Courses Available Online

World101 is a free resource produced by the Council on Foreign Relations that uses compelling multimedia content and storytelling to convey the basics of pressing global issues and fundamental foreign policy topics. Designed for both non-specialist learners (ages sixteen to twenty-four) in formal classroom settings and the interested public, each World101 module features a series of lessons along with a companion teaching resource. The lessons provide a topical overview and historical background, and through an array of interactive resources—videos, timelines, slideshows, maps, charts, and infographics—they offer a deep dive into the topic while demonstrating real-world relevance to users’ daily lives.

This first unit of ten modules includes globalization, terrorism, nuclear proliferation, climate change, migration, cyberspace and cybersecurity, global health, trade, monetary policy and currencies and international development. This is the first of six units that will ultimately comprise the full World101 course of nearly 50 modules. The second unit, called Regions of the World, will be released in the fall.
